

E&B PAVING.Inc

**WORLD-CLASS
SOLUTIONS**

From One Level to the Next.

When Jack Euratte and Richard Bedwell built an asphalt plant adjacent to a stone quarry in Muncie, Indiana in 1967, they likely weren't thinking of their new paving company as a provider of world-class solutions. Nor did they probably have any idea their hand-drawn corporate mascot, Little Jake, would grow to be such a giant in the state's construction industry.

They simply delivered outstanding asphalt paving services to customers throughout Northeast Indiana.

E&B Paving still retains Jack and Richard's original vision of supporting local customers with great service and contracting expertise. But we've taken their concept to a different – and stratospherically higher – level.

We call it:

World-Class Solutions at a Local Level.

Our Philosophy is Still Local.

From this humble beginning, fast forward to the 21st century. E&B Paving is now one of the largest asphalt and concrete paving contractors in Indiana. Although our technology, equipment, resources and capabilities have grown to world-class status, we have never lost sight of the importance of delivering them locally.

We still believe the best solutions are provided by transportation construction professionals who understand local market issues and paving conditions. From our offices and plants throughout Indiana, E&B continues to offer on-site management and accountability for every project...

large or small, public or private. Which means when you have a question, need ideas or want consulting advice, a local expert will deliver your solution.

E&B's scope and corporate depth are further buttressed by our parent company, Irving Materials, Inc. (IMI), a concrete, aggregate and building materials supplier with customers throughout the Midwest and South, as well as Specialties Company, an E&B subsidiary firm which offers soil stabilization, concrete breaking, rubblelization and other specialized construction expertise to customers worldwide.

Solutions Central.

We attribute E&B's award-winning paving solutions to three complementary factors:

1. Dedicated, expert employees...
2. Who are committed to supporting customers and helping them achieve their goals...
3. Through a broad range of services that meet and exceed customer expectations.

Our asphalt and concrete paving and consulting services can be applied to highways extending thousands of lane miles or to parking lots accommodating a few dozen vehicles...and everything in between.

E&B's distinguished client list includes hundreds of federal, state, county and local governments and agencies; general contractors; commercial, residential and industrial developers; and private businesses of all sizes. Regardless of a customer's size or location, we make the same offer to every one of them: Tell us your transportation construction needs and we'll demonstrate how E&B can support them with a world-class solution.

- > Heavy highway and road construction
- > Resurfacing
- > Residential and commercial development streets and driveways
- > Parking lots
- > Airport runways, taxiways and hangars
- > Commercial and industrial dolly pads
- > Asphalt milling
- > Curbs and storm sewers
- > Excavation services

World Class Entails Special Responsibilities.

As a provider of world-class solutions, we know we must do more – much more – to maintain our leadership mantle.

E&B Paving is a longstanding participant in state and national trade associations that support the paving and construction industries. Our team members actively serve in officer and committee positions for such organizations as the National Asphalt Pavement Association, Asphalt Pavement Association of Indiana, American Concrete Pavement Association, Indiana Ready Mixed Concrete Association, Indiana Construction Association, Build Indiana Council and the Asphalt Pavement Alliance, among others.

We also promote environmental sustainability at applicable job sites. While asphalt recycling has been an E&B

hallmark since our earliest days in Muncie, we also utilize new environmentally-friendly warm-mix asphalt processes that consume less energy and generate fewer emissions than hot-mix alternatives, as well as green porous asphalt and pervious concrete technologies that capture storm water and allow it to seep into the ground, thus recharging groundwater and reducing storm water runoff erosion.

And never forgetting the local communities where our employees and customers live and work, E&B Paving is a deeply committed corporate partner with organizations, schools and events that help enhance healthy neighborhoods and promote long-term community growth.

It's Your Turn

Now it's your turn to tell us your transportation construction needs. Visit our website where you can find contact information for E&B's offices or electronically submit your project bid request. A local E&B Paving expert will take it from there to demonstrate how we can support your needs and exceed your expectations with our world-class solutions.
